LAB SPECIFIC TRAINING DOCUMENTATION FORM

Lab specific training is required in addition to Lab Safety/Chemical Hygiene Plan (CHP) Orientation for specific hazards and procedures unique to each lab. This training includes the following information:

- Hazards of specific laboratory chemicals and procedures
- Location of laboratory SOPs
- Procedures requiring prior approval
- Chemical storage and inventory practices
- Specific use of laboratory hoods and other engineering controls
- Availability, selection, use and maintenance of PPE (e.g., gloves, safety glasses, etc.)
- Location and availability of MSDSs and other chemical hazard reference material
- Emergency procedures and equipment (i.e., eyewash stations, spill and fire response)

TRAINER	LAB PERSONNEL	DATE

NOTE: <u>All</u> lab personnel must also complete a lab safety (CHP) orientation course.

Attach additional sheets if necessary
